

# **SB 1383 Education and Outreach Resources**

## **General Information**

The SB 1383 draft regulations require that jurisdictions conduct education and outreach on organics recycling to all residents, businesses (including those that generate edible food that can be donated) haulers, solid waste facilities, and local food banks and other food recovery organizations. Even though the SB 1383 regulations don't go into effect until January 1, 2022, jurisdictions need to start planning now to adequately resource the programs. To assist with this effort, CalRecycle will continue to publish resources to this page to provide jurisdictions with education and outreach tools.

Please see the [SLCP Rulemaking webpage](#) for additional information.

## **What is AB 827 and why was it passed?**

California's Legislature, through AB 827 (McCarty, 2019), amended two existing laws - the Mandatory Commercial Recycling law, PRC Section 42649-42649.7, commonly referred to as MCR, and the Mandatory Commercial Recycling Organics Recycling law, PRC Section 42649.8-42649.87, commonly referred to as MORE.

AB 827 is intended to educate and involve consumers in achieving the state's recycling goals by requiring businesses subject to MCR and/or MORE to make recycling and/or organic recycling bins available to customers.
